

## Meeting Notes:

Arianna wanted to get all of the content on the html site, so we don't get a lot of imagery moments.

That will be the focus of her work over the next few weeks. Here is what will change:

- we want a big type as imagery moment on the landing page. This will transform it from a page that's more information driven to one that is less info more imagery
- will incorporate smaller imagery moments in the background of other pages.

We want to do something that we're still wondering how we're going to do, but, if possible, we will be trying to have the nav bar disappear at the big landing moment, but appear for the other pages and when you scroll. We're looking into how to do this.
