Project Title: [Bogosort](#)

I think I'm going to have multiple pages, with each corresponding to a different tab in the wikipedia page. There aren't pictures on the website, but there is a very popular animation that I can put on when explaining the algorithm. I'm hoping to make the website a little fun.

- **Introduction to Bogosort and possible animation**

- **Pseudocode and C/Python implementations**

- **Runtime Analysis -** could explain big O but maybe not.

- **Variations**

- **Sources**
